

CAT - CONNECTOR FOR TRANSVERSAL GROUNDING

CAT-58-16

Description

Purpose: Connection between ground rod to cable. Suitable for COPPERSTEEL or copper cables.

Characteristics: Spring system connection (permanent tightening). High resistance to corrosion. Easy application.

Application: Grounding systems in general (power distribution systems, grounding grids, residential, building and industrial grounding), grounding in telecommunication networks, grounding in substations).

Material: Copper for internal parts and stainless steel for external parts.

Application Tool: Water pump pliers.
