

IH - GROUND ROD

IH-101

Description

Characteristics: Straight, consisting of a solid carbon steel core, coated with a uniform layer of electrolytic copper (minimum 254 microns = 10mils) through an electroplating process, which ensures the inseparable and homogeneous union of the metals.

Application: Grounding systems in general (power generation, transmission and distribution systems), grounding grids, residential, building and industrial grounding, substations grounding and telecommunication networks.

Material: Carbon steel core (SAE 1010/1020) with electrolytic copper coating of minimum purity of 99.9% without a trace of zinc.
